Project User Interface

Name	**Ritika Mishra**
Problem Definition	**Design a user interface for a web application using ASP.NET and C#. Create pages such as Home, About, Contact, and Listing. The UI should simulate interactive elements.**
Problem Objectives	**1. Create a structured layout with consistent navigation.** **2. Include interactive design elements like buttons, search bars, and forms.** **3. Ensure responsiveness across different devices.** **4. Use CSS and ASP.NET controls to enhance design.**
